

SpotSee®

Parts Change Notice

Affected Product: ColdMak

Effective Date: 11-May-2022

Device Identification: ColdMark -3C/26F
ColdMark 0C/32F
ColdMark 2C/36F
ColdMark 5C/41F
ColdMark 10C/50F

Description & Purpose: * Supply chain shortages have required SpotSee to consider different alternatives for the backing of the ColdMark.

* The paperboard used on the back of the ColdMark units is unavailable at the present time.

* While we continue to explore alternatives, we have put in place a method to seal and mount the indicators with a brown adhesive backing.

*This change does not affect the intended use or performance of the product.

*The change is temporary and will be in place only until SpotSee secures a paperboard solution.

Images of new solution are below:

This change will not affect product's form, fit, or function.
